Learning Brian's Tiny Try-It Lab

Predict, try, notice and wonder - at your own pace

BRIAN'S: LEARNING

Choose a simple activity with a grown-up, such as testing which safe household objects float, watching a shadow move, or noticing ice melt.

Today I want to find out:

I think...

What I tried (grown-up helps with materials):

What I noticed:

A new question for Curious Brian:

A prediction can be different from what happens. That gives Learning Brian something new to explore.
